Subject index*

A

Abdominal pain, agammaglobulinemia, neutropenia, and fever (Buckley and Rowlands), 308 (Allergy rounds)

Acetylcholine, histamine, and propranolol in anaphylactic hypersensitivity in guinea pigs, airway responses to (Popa, V., et al.), 344

Actinomycetes, thermophilic, isolated from residential heating and humidification systems, characterization of (Seabury, J., et al.), 161

Adenosine monophosphate (AMP), urinary cyclic, effect of ephedrine sulfate on, in normals, 89 (Abst.)

Adenyl cyclase, epidermal, regulation of, in normal and *Bordetella pertussis* vaccinated mice, 93 (Abst.)

Adenylate cyclase, stimulation of, by phentolamine in leukocytes of asthmatic children, 106 (Abst.)

Adjuvance in Cebus monkey, *30* (Abst.)

Adolescents, heroin use in, hypermacroglobulinemia associated with (Grieco and Chuang), 152

Adrenergic drugs and atropine, effect of, on electrically stimulated human and guinea pig isolated tracheas, 90 (Abst.)

effect of, on mast cells, 91 (Abst.)

Aeroallergen hypersensitivity, allergic diseases, penicillin hypersensitivity, and, prevalence of, in various populations, 100 (Abst.)

Aerosol immunization, synthesis of rat IgE by, *6* (Abst.)

Agammaglobulinemia, neutropenia, fever, and abdominal pain (Buckley and Rowlands), 308 (Allergy rounds)

Aggregated IgE, characteristics of complement fixation by, *36* (Abst.)

Aggregation, platelet, in atopic and normal patients (Harwell et al.), 274

effect of epinephrine on, in normal and atopic subjects (Solinger et al.), 29

Aging and acute illness, effect of, on delayed hypersensitivity, 127 (Abst.)

Air quality of American homes, *8* (Abst.)

Airway constriction, histamine-induced, inhibition of, by ascorbic acid (Zuskin, E., et al.), 218

obstruction, detection of, in exercise-induced asthma, 121 (Abst.)

Albumin, egg, in rat, effect of various adjuvant regimens and of nematode infection on reaginic antibody response to, *15* (Abst.)

macroaggregated, abnormal degradation of, by leukocytes in asthma; transferable defect, 89 (Abst.)

ALG, antihuman, inhibition of mixed lymphocyte reaction with Fab fragments from, *30* (Abst.)

Algae, green, clinical sensitivity to, demonstrated by nasal challenge and in vitro tests of immediate hypersensitivity (Bernstein and Saffermann), 22

Allergen(s), demonstration of reagin-allergen complexes formed on elution of reagins from immunosorbent with, *14* (Abst.)

derived from pollen, small particles as source of (Lowell), 187 (Correspondence)

extracted from cat pelts, physicochemical and biologic properties of, 118 (Abst.)

and histamine induced wheal and flare response, inhibitory effect of antiallergy drugs on (Galant et al.) 11

inhalation challenges in asthmatic patients, duration and specificity of sodium cromolyn on, 87 (Abst.)

intravenous infusion of, mechanism of nonspecific desensitization of peripheral leukocytes during, 80 (Abst.)

Ra5, ragweed pollen: isolation, chemical properties, and genetic basis for its cutaneous activity in man, 81 (Abst.)

short ragweed, non-pollen sources of, 114 (Abst.)

Allergenic and biological activities of melittin from honey bee venom, *46* (Abst.)

*January, pp. 1-64; February, pp. 65-130; March, pp. 131-190; April, pp. 191-254; May, pp. 255-320; June, pp. 321-386.

Abstracts: January, pp. *1-8*; February, pp. *9-16*; March, pp. *17-24*; April, pp. *25-32*; May, pp. *33-40*; June, pp. *41-48*.

Allergenic—Cont'd
components of *Bacillus subtilis* enzymes used in detergents, characterization of, 119 (Abst.)
extracts of house dust and bacterial vaccine, effect of, on respiratory infections of mice (Hardegree et al.), 1
Allergic broncho-pulmonary aspergillosis; clinical immunology: (2) skin, nasal and bronchial tests, *5* (Abst.)
contact dermatitis, basophilic leukocytes in, 127 (Abst.)
to corticosteroids, *10* (Abst.)
sensitization to iron (Baer), 35
diseases, penicillin hypersensitivity, and aeroallergen hypersensitivity in various populations, prevalence of, 100 (Abst.)
encephalomyelitis, reversal of disease state with antigen in; suppression of immune response, *12* (Abst.)
problem in human reproduction, sperm antibodies as, 102 (Abst.)
reaction(s), immediate, to human seminal plasma, 102 (Abst.)
after internal fixation of fracture using Vitallium plate (Symeonides, P. P., et al.), 251 (Brief communication)
responses, late cutaneous, and IgE-dependent reactions, relationship between, 123 (Abst.)
serum, human, and specific antigen or IgE myeloma protein and anti-IgE, failure to obtain histamine release from rat mast cells exposed to, 82 (Abst.)
serotonin and histamine release from rat mast cells sensitized with, 82 (Abst.)
Allergy(ies), allergists, and accountability; president's address (Middleton), 321
American Medical Association Section on, 1973 meeting of, 320 (Announcement)
to aminosalicylic acid, isoniazid and streptomycin, experience with lymphocyte transformation tests in evaluating, *12* (Abst.)
atopic, in man, genetic basis for, 80 (Abst.)
childhood, development of, in infants fed breast, soy, or cow milk (Halpern, S. R., et al.), 139
effects of cromolyn sodium on, 253 (Correspondence)
epicutaneous test techniques, reproducibility of, 113 (Abst.), (Galant and Maibach), 245
Hymenoptera, correlation of severity of reaction, skin sensitivity and leukocyte histamine release in, 98 (Abst.)
immunoglobulin E and, in antibody immunodeficiencies, 111 (Abst.)
Allergy(ies)—Cont'd
mechanism of, to components of commercial bovine thyrotropin (Kirkpatrick et al.), 296
miscellaneous, *8, 20, 28, 45* (Absts.)
rounds, 319 (Editorial)
Alpha-1-antitrypsin (AAT) protease inhibitor (Pi) types in recurrent and chronic lung disease of childhood, 85 (Abst.)
Alternaria, adverse reactions to immunotherapy with, 84 (Abst.)
American Academy of Allergy: abstracts of papers given at annual meeting, 78
Progress Report of Penicillin Study Group of, 119 (Abst.)
Board of Allergy and Immunology, 190 (Announcement)
Medical Association Section on Allergy, 1973 meeting of, 320 (Announcement)
Aminosalicylic acid, isoniazid and streptomycin, experience with lymphocyte transformation tests in evaluating allergy to, *12* (Abst.)
AMP responses, urinary and plasma cyclic, responses to epinephrine in asthmatic and normal subjects, 88 (Abst.)
Anaphylactic histamine release, inhibition of, by glucose-6-phosphate product of glycogenolysis mediated by cyclic AMP, 107 (Abst.)
Anaphylaxis, *7, 24* (Abst.)
(SRS-A), release of histamine and slow reacting substance of, by IgE-anti-IgE reactions on monkey mast cells, 7 (Abst.)
Angioedema, vibratory, clinical and pharmacologic studies of, 98 (Abst.)
Announcements, 190, 320, 357
Antibiotics, double-blind evaluation of, in status asthmaticus, 96 (Abst.)
Antibody(ies), anti-DNA, detection of, in systemic lupus erythematosus (SLE) by counterimmunoelectrophoresis (CIE), 101 (Abst.)
antigen-, mediated desensitization of human lung fragments, 80 (Abst.)
to DNP, dominance of cell clone forming, *23* (Abst.)
-forming cells, variation in accessible cell surface immunoglobulin among, *47* (Abst.)
IgE, effect of corticosteroids on seasonal rises in, 112 (Abst.)
exponential relationship of leukocyte sensitivity with, 108 (Abst.)
immunodeficiencies, immunoglobulin E and allergy in, 111 (Abst.)
levels, IgE, symptoms and, in children with hay fever, 78 (Abst.)
measurements, specific IgE, in diagnosis of ragweed hay fever, 112 (Abst.)
other, immunoglobulin E "gatekeeper" for? 109 (Abst.)

Antibody(ies)—Cont'd
to ragweed in external secretions, effect of immunotherapy on appearance of (Tse, K. S., et al.), 208
rat IgE and IgGa, effect of phosphatidylserine on immediate hypersensitivity reactions mediated by, 83 (Abst.)
reaginic, response to egg albumin in rat, effect of various adjuvant regimens and of nematode infection on, *15* (Abst.)
responses, IgE and IgG, during immunotherapy, 79 (Abst.)
specific, production of, by lymphocytes of bursa of Fabricius, *21* (Abst.)
sperm, as allergic problem in human reproduction, 102 (Abst.)
total IgE and IgE, in serum, effect of immunotherapy and pollen exposure on, 109 (Abst.)
Antigen(s)-antibody complexes in/on eosinophils in nasal secretions from patients allergic to ragweed, 124 (Abst.)
mediated desensitization of human lung fragments, 80 (Abst.)
avian, immunologic aspects of hypersensitive lung disease from exposure to, 104 (Abst.)
bronchial sensitivity in children with chronic asthma, methacholine and, effect of natural measles and chicken pox on, 94 (Abst.)
^{14}C-labeled ragweed, studies with; decreased antigen uptake by leukocytes of ragweed-sensitive individuals, 115 (Abst.)
content, potency and rye Group I, of commercially prepared grass pollen extracts, 116 (Abst.)
disposal, mechanism of; inhibition of bacterial adherence by secretory immunoglobulin A, *13* (Abst.)
E (Ag E), ragweed, in vitro cellular responses to, 126 (Abst.)
content, changes in, of short ragweed during maturation, 115 (Abst.)
and Ra.3, ragweed pollen, studies on immunological relationship of (Lichtenstein et al.), 285
stability of, in aqueous and glycerinated short ragweed extracts stored at various temperatures, 114 (Abst.)
food, cellular events leading to immunity following ingestion of, 116 (Abst.)
-induced histamine release, specificity of reaction and comparison with; reversed in vitro anaphylaxis induced by anti-IgG, *24* (Abst.)
mite, immunologic survey of house dust for, 118 (Abst.)
ragweed, localization of, in intact ragweed pollen grain, *18* (Abst.)
reversal of disease state with, in allergic encephalomyelitis; suppression of immune response, *12* (Abst.)
Antigen(s)—Cont'd
specific, or IgE myeloma protein and anti-IgE, failure to obtain histamine release from rat mast cells exposed to human allergic serum and, 82 (Abst.)
stimulation of histamine-forming capacity by, in sensitized human leukocytes, *28* (Abst.)
in vitro, interaction between "sensitized lymphocytes" and; vascular permeability induced by skin-reactive factor, *36* (Abst.)
Antigenic histamine release in human leukocytes, effect of hydrocortisone on, 84 (Abst.)
Antihistamines, histamine and, changes in patency of dog's Eustachian tube induced by, *20* (Abst.)
side effects with, degree and duration of skin test suppression and (Cook et al.), 71
use of, in asthma, *26* (Abst.)
Anti-IgG, reversed in vitro anaphylaxis induced by; specificity of reaction and comparison with antigen-induced histamine release, *24* (Abst.)
Antiserum, effect of, to thymus ribosomal fraction (ATRS) on response of thymocytes to Concanavalin A (Con A), 105 (Abst.)
Antitrypsin defect, hereditary alpha-1, in childhood lung disease, 86 (Abst.)
Arthritis, juvenile rheumatoid, reversal of selective IgA deficiency in child with, *44* (Abst.)
Ascorbic acid, inhibition of histamine-induced airway constriction by (Zuskin, E., et al.), 218
Aspergillosis, allergic broncho-pulmonary; clinical immunology: (2) skin, nasal and bronchial tests, *5* (Abst.)
normal granulocyte infusion therapy for, in chronic granulomatous disease, *45* (Abst.)
Aspergillus, house dust and, dermal response to components of, 117 (Abst.)
precipitins to, immunoglobulin E in sera that contain, 111 (Abst.)
Asthma, acute, x-ray changes in; study of 515 admissions, 120 (Abst.)
β-adrenergic blockade theory of; fact or fantasy, 93 (Abst.)
bronchial, adverse effects of phenobarbital on corticosteroid metabolism in patients with, *3* (Abst.)
methacholine challenge and diagnosis of, 94 (Abst.)
and recurrent pneumonia, prognosis and lung function in children with, *18* (Abst.)
chronic, effect of alternate-day prednisone on white blood count in children with (Chai and Gilbert), 65

Asthma, chronic, effect—Cont'd
of natural measles and chicken pox on methacholine and antigen bronchial sensitivity in children with, 94 (Abst.)
due to inhaled chemical agents—piperazine dihydrochloride, *43* (Abst.)
tolylene di-isocyanate, *42* (Abst.)
and emphysema, biochemical study on sputum in, 86 (Abst.)
exercise-induced, detection of airway obstruction in, 121 (Abst.)
pharmacological assessment of single drugs and drug combinations in, 88 (Abst.)
extrinsic, sequelae of, associated with *Bacillus subtilis* enzymes, 120 (Abst.)
and hay fever, *2*, *18*, *26*, *34*, *42* (Absts.)
"infectious," transcricothyroid cultures in, 122 (Abst.)
leukocytes in, abnormal degradation of macroaggregated albumin by leukocytes in; transferable defect, 89 (Abst.)
quantitative measurement of bronchial muscle in men with, *44* (Abst.)
use of antihistamines in, *26* (Abst.)
Asthmatic bronchitis, disabling, elemental chemical diet therapy in, 117 (Abst.)
children, chronic, effect of immunotherapy in (Tuchinda and Chai), 131
growth of, during treatment with alternate-day steroids, 122 (Abst.)
leukocytes of, stimulation of adenylate cyclase by phentolamine in, 106 (Abst.)
on long-term disodium cromoglycate, renal tubular function in, *42* (Abst.)
and normal subjects, urinary and plasma cyclic AMP responses to epinephrine in, 88 (Abst.)
patients, duration and specificity of sodium cromolyn on allergen inhalation challenges in, 87 (Abst.)
nonsteroid and steroid treated, in vitro immunoglobulin formation by peripheral lymphocytes of normal donors and, 90 (Abst.)
reactions, late (LAR) in ragweed pollen sensitivity, 95 (Abst.)
Asthmatics, inhalation challenge in, 87 (Abst.)
intravenous infusion of histamine in, effects of disodium chromoglycate on, 121 (Abst.)
and normal siblings, similar incidence of upper respiratory infections in, 122 (Abst.)
Ataxia telangiectasia, relation of IgE and IgA to respiratory tract disease in isolated IgE deficiency, IgA deficiency, and; immunoglobulin E and immunologic deficiency diseases, *37* (Abst.)
Atmospheric pollen and fungal spores in Hamilton, Ontario, 1972 (Abst.)
Atopic allergy in man, genetic basis for, 80 (Abst.)
and normal patients, platelet aggregation in, 93 (Abst.), (Harwell et al.), 274
subjects, normal and, effect of epinephrine on platelet aggregation in (Solinger et al.), 29
Atropine, effect of adrenergic drugs and, on electrically stimulated human and guinea pig isolated tracheas, 90 (Abst.)
Autosensitization of lymphocytes against thymus reticulum cells, *22* (Abst.)
Avian antigens, immunologic aspects of hypersensitive lung disease from exposure to, 104 (Abst.)

B

Bacillus subtilis enzyme(s), effect of laundry detergent containing, in producing sensitization reactions in guinea pigs, *20* (Abst.)
sequelae of extrinsic asthma associated with, 120 (Abst.)
used in detergents, characterization of allergenic components of, 119 (Abst.)
Bacterial adherence, inhibition of, by secretory immunoglobulin A; mechanism of antigen disposal, *13* (Abst.)
vaccine, allergenic extracts of house dust and, effect on respiratory infections of mice (Hardegree et al.), 1
Basophilic leukocytes in allergic contact dermatitis, 127 (Abst.)
Basophils, human, binding of IgE molecules on, 79 (Abst.)
BCG tuberculosis, generalized, with fatal course in two sisters, *4* (Abst.)
-vaccinated children with whooping cough, investigation of responsiveness of, to tuberculin, *10* (Abst.)
Bee, honey, venom, allergenic and biological activities of melittin from, *46* (Abst.)
β-adrenergic blockade theory of asthma; fact or fantasy? 93 (Abst.)
Biochemical study on sputum in asthma and emphysema, 86 (Abst.)
Biological activity(ies), allergenic and, of melittin from honey bee venom, *46* (Abst.)
of extracts prepared from grass pollens, effect of viability or nonviability of, *27* (Abst.)
properties, physicochemical and, of allergen extracted from cat pelts, 118 (Abst.)
Bone marrow-derived lymphoid cells (B cells): functional depletion with cobra factor and fresh serum, *38* (Abst.)

Bordetella pertussis extract (Bpe), inhibition by, of tritiated thymidine uptake (TTU) in stimulated human lymphocytes, 92 (Abst.)
vaccinated mice, normal and, regulation of epidermal adenyl cyclase in, 93 (Abst.)
Bovine thyrotropin, commercial, mechanism of allergy to components of (Kirkpatrick et al.), 296
Bronchial asthma, adverse effects of phenobarbital on corticosteroid metabolism in patients with, *3* (Abst.)
and recurrent pneumonia, prognosis and lung function in children with, *18* (Abst.)
challenge and skin test correlations, *11* (Abst.)
muscle, quantitative measurement of, in men with asthma, *44* (Abst.)
obstructive reaction, late, to experimental inhalation of house dust extract, *26* (Abst.)
tests, skin, nasal and; allergic bronchopulmonary aspergillosis; clinical immunology, *5* (Abst.)
tree, human, method to detect single pollen grains in, 113 (Abst.)
Bronchiolitis, immunoglobulin E in, *19* (Abst.)
Bronchitis, disabling asthmatic, elemental chemical diet therapy in, 117 (Abst.)
Bronchopulmonary aspergillosis, allergic; clinical immunology: (2) skin, nasal and bronchial tests, *5* (Abst.)
fluids in pulmonary alveolar proteinosis (Rupp, G. H., et al.), 227
Bursa of Fabricius, production of specific antibody by lymphocytes of, *21* (Abst.)

C

C_1 INH, changes in activity for synthetic substrates upon cell binding, heat inactivation and interaction with; fluid phase destruction of C_2^{hu} by C_1^{hu}, *15* (Abst.)
C_2^{hu}, fluid phase destruction of, by C_1^{hu}; changes in activity for synthetic substrates upon cell binding, heat inactivation and interaction with C_1 INH, *15* (Abst.)
C3, evidence against requirement of, for IgE-mediated histamine release; role of complement in human immediate hypersensitivity, 110 (Abst.)
Candidiasis, chronic muco-cutaneous, immunodeficiencies in, *29* (Abst.)
mucocutaneous, haplotype-associated immune responses in family of patient with, 100 (Abst.)
Carrier, hapten to, altered immunogenicity produced by change in mode of linkage of, *21* (Abst.)
Cat pelts, allergen extracted from, physicochemical and biologic properties of, 118 (Abst.)
Catecholamines, failure of, to inhibit epidermal mitosis in vitro (Carr et al.), 255
Cebus monkey, adjuvance in, *30* (Abst.)
Cedar of Lebanon *(Cedrus libani)* dust, respiratory symptoms following brief exposure to, *48* (Abst.)
Cedrus libani (cedar of Lebanon) dust, respiratory symptoms following brief exposure to, *48* (Abst.)
Cell(s) binding, heat inactivation and interaction with C_1 INH, fluid phase destruction of C_2^{hu} by C_1^{hu}, *15* (Abst.)
bone marrow-derived lymphoid (B cells): functional depletion with cobra factor and fresh serum, *38* (Abst.)
clone forming antibody to DNP, dominance of, *23* (Abst.)
mast, effect of adrenergic drugs on, 91 (Abst.)
rat mast, exposed to human allergic serum and specific antigen or IgE myeloma protein and anti-IgE, failure to obtain histamine release from, 82 (Abst.)
sensitized with allergic serum, serotonin and histamine release from, 82 (Abst.)
surface immunoglobulin, accessible, variation in, among antibody-forming cells, *47* (Abst.)
test, rat mast, some comments on (Perelmutter et al.; Haddad and Korotzer), 60 (Correspondence)
thymic and marrow lymphoid, elaboration of MIF by; cellular immunity in vitro, *11* (Abst.)
thymus reticulum, autosensitization of lymphocytes against, *22* (Abst.)
traffic, lymphoid, in chicken, ontogenetic studies on, *14* (Abst.)
Cellular immunity in newborn infant; is cellular immunity passed from mother to fetus? 104 (Abst.)
responses, in vitro, to ragweed antigen E (Ag E), 126 (Abst.)
Chemical diet therapy, elemental, in disabling asthmatic bronchitis, 117 (Abst.)
mediators, immunologic release of, from human nasal polyps, 105 (Abst.)
non-immunogenic, induction of cross-tolerance for; feeding dichloronitrobenzene induces tolerance to dinitrochlorobenzene, *3* (Abst.)
Chicken(s), hypersensitivity pneumonitis to, in horses, 103 (Abst.)
ontogenetic studies on lymphoid cell traffic in, *14* (Abst.)
pox, effect of natural measles and, on methacholine and antigen bronchial sensitivity in children with chronic asthma, 94 (Abst.)

Childhood allergy, development of, in infants fed breast, soy, or cow milk (Halpern, S. R., et al.), 139
lung disease, hereditary alpha-1 antitrypsin defect in, 86 (Abst.)
recurrent and chronic lung disease of, alpha-1-antitrypsin (AAT) protease inhibitor (Pi) types in, 85 (Abst.)
Children, asthmatic, growth of, during treatment with alternate-day steroids, 122 (Abst.)
stimulation of adenylate cyclase by phentolamine in leukocytes of, 106 (Abst.)
with chronic asthma, effect of alternate-day prednisone on white blood count in (Chai and Gilbert), 65
chronic asthmatic, effect of immunotherapy in (Tuchinda and Chai), 131
with hay fever, symptoms and IgE antibody levels in, 78 (Abst.)
high risk, prevention of varicella in; collaborative study, *27* (Abst.)
vaccinated before and after 1 year of age, immunity to measles in, *34* (Abst.)
Clinical immunology: (2) skin, nasal and bronchial tests; allergic bronchopulmonary aspergillosis, *5* (Abst.)
and pharmacologic studies of vibratory angioedema, 98 (Abst.)
sensitivity to green algae demonstrated by nasal challenge and in vitro tests of immediate hypersensitivity (Bernstein and Safferman), 22
Cobra factor and fresh serum, functional depletion with; bone marrow-derived lymphoid cells (B cells), *38* (Abst.)
Cod, hypersensitivity to, concentration of IgE antibodies, PK titers, and chopped lung titers in sera from children with (Foucard et al.), 39
COLD, chronic obstructive lung disease, selective immunoglobulin A (IgA) deficiency and, family study, 123 (Abst.)
Cold urticaria, heat and, localized (Tennenbaum and Lowney), 57 (Brief communication)
Complement (C) and Hageman factor (Factor XII), simultaneous deficiencies of early components of, 101 (Abst.)
Compound 48/80, ragweed, and histamine, histologic studies of human skin test responses to (Atkins et al.), 263
Concanavalin A (Con A), effect of antiserum to thymus ribosomal fraction (ATRS) on response of thymocytes to, 105 (Abst.)
Contact dermatitis, allergic, basophilic leukocytes in, 127 (Abst.)
Contact—Cont'd
sensitivity, induction of cross-tolerance for, by a non-immunogenic chemical; feeding dichloronitrobenzene induces tolerance to dinitrochlorobenzene, *3* (Abst.)
sensitization, allergic, to iron (Baer), 35
Contrast media, radiographic, administration of, to patients with history of previous reaction, 99 (Abst.)
Correspondence, 60, 129, 187, 253
Corticosteroid(s), allergic contact dermatitis to, *10* (Abst.)
effect of, on seasonal rises in IgE antibody, 112 (Abst.)
metabolism in patients with bronchial asthma, adverse effects of phenobarbital on, *3* (Abst.)
Cromolyn sodium, controlled study of (Perlman), 187 (Correspondence)
effects of, on allergy, 253 (Weinberger; Bernstein), (Correspondence)
Cultures, transcricothyroid, in "infectious" asthma, 122 (Abst.)

D

Defect, transferable; abnormal degradation of macroaggregated albumin by leukocytes in asthma, 89 (Abst.)
Degradation, abnormal, of macroaggregated albumin by leukocytes in asthma; transferable defect, 89 (Abst.)
Dermal response to components of house dust and Aspergillus, 117 (Abst.)
Dermatitis, allergic contact, basophilic leukocytes in, 127 (Abst.)
to corticosteroids, *10* (Abst.)
Dermatology, *3*, *10* (Absts.)
Desensitization of human lung fragments, antigen-antibody mediated, 80 (Abst.)
nonspecific, mechanism of, of peripheral leukocytes during intravenous infusion of allergen, 80 (Abst.)
for ragweed hay fever, is it immunologically specific? *2* (Abst.)
Detergent(s), characterization of allergenic components of *Bacillus subtilis* enzymes used in, 119 (Abst.)
laundry, containing *Bacillus subtilis* enzyme, effect of, in producing sensitization reactions in guinea pigs, *20* (Abst.)
Dichloronitrobenzene, feeding, induces tolerance to dinitrochlorobenzene; induction of cross-tolerance for contact sensitivity by non-immunogenic chemical, *3* (Abst.)
Diet therapy, elemental chemical, in disabling asthmatic bronchitis, 117 (Abst.)
Dinitrochlorobenzene, feeding dichloronitrobenzene induces tolerance to; induction of cross-tolerance for contact sensitivity by non-immunogenic chemical, *3* (Abst.)

Disease(s), chronic obstructive (COLD), selective immunoglobulin A (IgA) deficiency and, family study, 123 (Abst.)
hydatid, specific immunoglobulin in, *16* (Abst.)
hypersensitive lung, immunologic aspects of, from exposure to avian antigens, 104 (Abst.)
immunoglobulin E and immunologic deficiency; relation of IgE and IgA to respiratory tract disease in isolated IgE deficiency, IgA deficiency, and ataxia telangiectasia, *37* (Abst.)
immunologic deficiency, immunoglobulin E in; serum IgE concentration of patients with acquired hypogammaglobulinemia, thymoma and hypogammaglobulinemia, myotonic dystrophy, intestinal lymphangiectasia and Wiskott-Aldrich syndrome, *31* (Abst.)
Disodium chromoglycate, effects of, on intravenous infusion of histamine in asthmatics, 121 (Abst.)
long-term, renal tubular function in asthmatic children on, *42* (Abst.)
DNP, antibody to, dominance of cell clone forming, *23* (Abst.)
Dog's Eustachian tube, changes in patency of, induced by histamine and antihistamines, *20* (Abst.)
Drug(s), antiallergy, inhibitory effect of, on allergen and histamine induced wheal and flare response (Galant et al.), 11
and drug combinations, single, in exercise-induced asthma, pharmacological assessment of, 88 (Abst.)
metabolite, immune thrombocytopenia due to, *28* (Abst.)

E

Egg albumin in rat, effect of various adjuvant regimens and of nematode infection on reaginic antibody response to, *15* (Abst.)
Electron microscopy, scanning, of acute experimental hypersensitivity pneumonitis in rabbits, 103 (Abst.)
Emphysema, asthma and, biochemical study on sputum in, 86 (Abst.)
Emulsions, water-in-oil, conditions influencing in vitro stability of; mechanism of action of mineral oil adjuvants (Steinberg and Norman), 238
Encephalomyelitis, allergic, reversal of disease state with antigen in; suppression of immune response, *12* (Abst.)
Enzyme(s), *Bacillus subtilis*, effect of laundry detergent containing, in producing sensitization reactions in guinea pigs, *20* (Abst.)
sequelae of extrinsic asthma associated with, 120 (Abst.)
Enzyme(s), *Bacillus subtilis*—Cont'd
used in detergents, characterization of allergenic components of, 119 (Abst.)
-linked immunosorbent assay (ELISA), estimation of serum IgE by (Hoffman), 303
Eosinophil(s) derived inhibitor (EDI) of histamine release, 83 (Abst.)
in nasal secretions from patients allergic to ragweed, antigen-antibody complexes in/on, 124 (Abst.)
Ephedrine, effect of, on response to epinephrine in normal men (Nelson), 191
sulfate, effect of, on urinary cyclic adenosine monophosphate (AMP) in normals, 89 (Abst.)
Epicutaneous test techniques, allergy, reproducibility of, 113 (Abst.), (Galant and Maibach), 245
Epidermal adenyl cyclase, regulation of, in normal and *Bordetella pertussis* vaccinated mice, 93 (Abst.)
mitosis in vitro, failure of catecholamines to inhibit (Carr et al.), 255
Epinephrine, effect of, on platelet aggregation in normal and atopic subjects (Solinger et al.), 29
in normal men, effect of ephedrine on response to (Nelson), 191
urinary and plasma cyclic AMP responses to, in asthmatic and normal subjects, 88 (Abst.)
European Academy of Allergology and Clinical Immunology, 320 (Announcement)
Eustachian tube, dog's, changes in patency of, induced by histamine and antihistamines, *20* (Abst.)
Exercise-induced asthma, detection of airway obstruction in, 121 (Abst.)
pharmacological assessment of single drugs and drug combinations in, 88 (Abst.)
Extracts, aqueous and glycerinated short, stored at various temperatures, stability of antigen E in, 114 (Abst.)
commercially prepared grass pollen, potency and rye Group I antigen content of, 116 (Abst.)
house dust, allergenic, and bacterial vaccine, effect of, on respiratory infections of mice (Hardegree et al.), 1

F

Fab fragments from antihuman ALG, inhibition of mixed lymphocyte reaction with, *30* (Abst.)
Fabricius, bursa of, production of specific antibody by lymphocytes of, *21* (Abst.)
Fc fragment, immunoglobulin M: fixation of human complement by, *22* (Abst.)

F.D.A., some recent actions of, on current status of (McGovern), 129 (Correspondence)
Fever, abdominal pain, agammaglobulinemia, and neutropenia (Buckley and Rowlands), 308 (Allergy rounds)
Fetus, human, synthesis of IgE by, 78 (Abst.)
is cellular immunity passed from mother to; cellular immunity in newborn infant, 104 (Abst.)
Food antigen, cellular events leading to immunity following ingestion of, 116 (Abst.)
Fracture, allergic reaction after internal fixation of, using Vitallium plate (Symeonides, P. P., et al.), 251 (Brief communication)
Fungal spores, atmospheric pollen and, in Hamilton, Ontario, 1972, 124 (Abst.)

G

Gamma globulin, clinical remission of nongranulomatous ulcerative jejunoileitis with hypogammaglobulinemia after treatment with, *40* (Abst.)
Genetic basis for atopic allergy in man, 80 (Abst.)
for cutaneous activity in man, isolation, chemical properties and; ragweed pollen allergen Ra5, 81 (Abst.)
control and linkage to HL-A haplotypes; ragweed hay fever, 81 (Abst.)
Glucose-6-phosphate product of glycogenolysis mediated by cyclic AMP, inhibition of anaphylactic histamine release by, 107 (Abst.)
Glycogenolysis mediated by cyclic AMP, glucose-6-phosphate product of, inhibition of anaphylactic histamine release by, 107 (Abst.)
Good, Dr. Robert A., honorary fellowship awarded to, 320 (Announcement)
Granulocyte infusion therapy, normal, for aspergillosis in chronic granulomatous disease, *45* (Abst.)
Grass pollens, effect of viability or nonviability of, on biological activity of extracts prepared from, *27* (Abst.)
Guinea pig(s) fed picryl chloride, studies on localization of hapten in, 7 (Abst.)
isolated tracheas, electrically stimulated human and, effect of adrenergic drugs and atropine on, 90 (Abst.)
sensitization reactions in, effect of laundry detergent containing *Bacillus subtilis* enzyme in producing, *20* (Abst.)

H

Hageman factor (Factor XII), stimultaneous deficiencies of early components of complement (C) and, 101 (Abst.)
Haplotype(s)-associated immune responses in family of patient with mucocutaneous candidiasis, 100 (Abst.)
HL-A, genetic control and linkage to; ragweed hay fever, 81 (Abst.)
Hapten to carrier, altered immunogenicity produced by change in mode of linkage of, *21* (Abst.)
studies on localization of, in guinea pigs fed picryl chloride, 7 (Abst.)
Hay fever, asthma and, *18*, *42* (Absts.)
patients, some, specific sensitivity to individual grass pollens in, *34* (Abst.)
ragweed, genetic control and linkage to HL-A haplotypes, 81 (Abst.)
is "desensitization" immunologically specific? *2* (Abst.)
specific IgE antibody measurements in diagnosis of, 112 (Abst.)
symptoms and IgE antibody levels in children with, 78 (Abst.)
Heat and cold urticaria, localized (Tennenbaum and Lowney), 57 (Brief communication)
Heating and humidification systems, residential, characterization of thermophilic actinomycetes isolated from (Seabury, J., et al.), 161
Hereditary alpha-1 antitrypsin defect in childhood lung disease, 86 (Abst.)
Heroin use in adolescents, hypermacroglobulinemia associated with (Grieco and Chuang), 152
Histamine, acetylcholine, and propranolol in anaphylactic hypersensitivity in guinea pigs, airway responses to (Popa, V., et al.), 344
allergen and, induced wheal and flare response, inhibitory effect of antiallergy drugs on (Galant et al.), 11
and antihistamines, changes in patency of dog's Eustachian tube induced by, *20* (Abst.)
forming capacity by antigen in sensitized human leukocytes, stimulation of, *28* (Abst.)
hypersensitivity of pertussis-treated mice, effects of nucleotides on, 92 (Abst.)
immunologic release of, from human lung tissue, effect of prostaglandins on, 106 (Abst.)
-induced airway constriction, inhibition of, by ascorbic acid (Zuskin, E., et al.), 218
intravenous infusion of, in asthmatics, effects of disodium chromoglycate on, 121 (Abst.)
ragweed, and compound 48/80, histologic studies of human skin test responses to (Atkins et al.), 263
release, anaphylactic, inhibition of, by glucose-6-phosphate product of glycogenolysis mediated by cyclic AMP, 107 (Abst.)

Histamine release—Cont'd
antigenic, in human leukocytes, effect of hydrocortisone on, 84 (Abst.)
antigen-induced, specificity of reaction and comparison with; reversed in vitro anaphylaxis induced by anti-IgG, *24* (Abst.)
eosinophil derived inhibitor (EDI) of, 83 (Abst.)
failure to obtain, from rat mast cells exposed to human allergic serum and specific antigen or IgE myeloma protein and anti-IgE, 82 (Abst.)
IgE-mediated, evidence against requirement of C3 for; role of complement in human immediate hypersensitivity, 110 (Abst.)
from human leukocytes, heavy water enhances: evidence for microtubule involvement, *39* (Abst.)
serotonin and, from rat mast cells sensitized with allergic serum, 82 (Abst.)
of, and slow reacting substance of anaphylaxis (SRS-A) by IgE-anti-IgE reactions on monkey mast cells, 7 (Abst.)
Histologic studies of human skin test responses to ragweed, compound 48/80, and histamine (Atkins et al.), 263
Horses, hypersensitivity pneumonitis to chickens in, 103 (Abst.)
House dust and Aspergillus, dermal response to components of, 117 (Abst.)
and bacterial vaccine, effect of allergenic extracts of, on respiratory infections of mice, 1 (Hardegree et al.)
extract, late bronchial obstructive reaction to experimental inhalation of, *26* (Abst.)
immunologic survey of, for mite antigens, 118 (Abst.)
Human bronchial tree, method to detect single pollen grains in, 113 (Abst.)
complement, fixation of, by Fc fragment; immunoglobulin M, *22* (Abst.)
fetus, synthesis of IgE by, 78 (Abst.)
and guinea pig isolated tracheas, electrically stimulated effect of adrenergic drugs and atropine on, 90 (Abst.)
leukocytes, effect of hydrocortisone on antigenic histamine release in, 84 (Abst.)
Humidification systems, residential heating and, characterization of thermophilic actinomycetes isolated from (Seabury, J., et al.), 161
Hydatid disease, specific immunoglobulin in, *16* (Abst.)
Hydrocortisone, effect of, on antigenic histamine release in human leukocytes, 84 (Abst.)
Hydrocortisone—Cont'd
humoral and cellular reactions distinguished by; thymus-derived lymphocytes, *13* (Abst.)
and isoproterenol, effect of, on immunoglobulin synthesis (Smith, R. S., et al.), 328
Hymenoptera allergy, correlation of severity of reaction, skin sensitivity and leukocyte histamine release in, 98 (Abst.)
anaphylaxis; diagnostic use of pure venoms, 97 (Abst.)
sting deaths, studies of 400, 97 (Abst.)
Hypermacroglobulinemia associated with heroin use in adolescents (Grieco and Chuang), 152
Hypersensitivity to cod, concentration of IgE antibodies, PK titers, and chopped lung titers in sera from children with (Foucard et al.), 39
delayed, effect of aging and acute illness on, 127 (Abst.)
human immediate, role of complement in; evidence against requirement of C3 for IgE-mediated histamine release, 110 (Abst.)
pneumonitis to chickens in horses, 103 (Abst.)
primate model of, 125 (Abst.)
Hypogammaglobulinemia, nongranulomatous ulcerative jejunoileitis with; clinical remission after treatment with gamma globulin, *40* (Abst.)
Hyposensitization injections, lack of interferon induction in man by, 91 (Abst.)

I

Illness, acute, aging and, effect of, on delayed hypersensitivity, 127 (Abst.)
Immune response(s), haplotype-associated, in family of patient with mucocutaneous candidiasis, 100 (Abst.)
suppression of; reversal of disease state with antigen in allergic encephalomyelitis, *12* (Abst.)
thrombocytopenia due to drug metabolite, *28* (Abst.)
Immunity, cellular events leading to, following ingestion of food antigen, 116 (Abst.)
in newborn infant; is cellular immunity passed from mother to fetus? 104 (Abst.)
in vitro: elaboration of MIF by thymic and marrow lymphoid cells, *11* (Abst.)
to measles in children vaccinated before and after 1 year of age, *34* (Abst.)
protective, to *Nippostrongylus brasiliensis* in rat; central role of lymphocyte in worm expulsion, *38* (Abst.)
Immunization, aerosol, synthesis of rat IgE by, *6* (Abst.)

Immunoblasts and small gut, evidence for primary association between, *35* (Abst.)
Immunodeficiency(ies), antibody, immunoglobulin E and allergy in, 111 (Abst.)
in chronic mucocutaneous candidiasis, *29* (Abst.)
membrane receptors and in vitro responsiveness of lymphocytes in, 125 (Abst.)
Immunoelectrophoresis, counter-(CIE), detection of anti-DNA antibodies in systemic lupus erythematosus (SLE) by, 101 (Abst.)
Immunogenicity, altered, produced by change in mode of linkage of hapten to carrier, *21* (Abst.)
Immunoglobulin A (IgA) concentrations, salivary, nasal wash, and sputum, in atopic and nonatopic individuals (Salvaggio, J., et al.), 335
deficiency, selective, reversal of, in child with juvenile rheumatoid arthritis after plasma transfusions, *44* (Abst.)
secretory, inhibition of bacterial adherence by; mechanism of antigen disposal, *13* (Abst.)
selective, deficiency and chronic obstructive lung disease (COLD)—family study, 123 (Abst.)
accessible cell surface, variation in, among antibody-forming cells, *47* (Abst.)
-deficient and normal human subjects, intestinal microflora of, *39* (Abst.)
E, aggregated, characteristics of complement fixation by, *36* (Abst.)
and allergy in antibody immunodeficiencies, 111 (Abst.)
antibody(ies), effect of corticosteroids on seasonal rises in, 112 (Abst.)
exponential relationship of leukocyte sensitivity with, 108 (Abst.)
levels, symptoms and, in children with hay fever, 78 (Abst.)
measurements, specific, in diagnosis of ragweed hay fever, 112 (Abst.)
PK titers, and chopped lung titers, concentration of, in sera from children with hypersensitivity to cod (Foucard et al.), 39
in serum, total IgE and, effect of immunotherapy and pollen exposure on, 109 (Abst.)
-anti-IgE reactions on monkey mast cells, release of histamine and slow reacting substance of anaphylaxis (SRS-A) by, 7 (Abst.)
in bronchiolitis, *19* (Abst.)
concentrations, serum and nasal, seasonal changes in (Yunginger and Gleich), 174
-dependent reactions, relationship between late cutaneous allergic responses and, 123 (Abst.)
"gatekeeper" for other antibodies? 109 (Abst.)
Immunoglobulin E—Cont'd
and IgG antibody responses during immunotherapy, 79 (Abst.)
and IgGa antibodies, rat, in vitro and in vivo, effect of phosphatidylserine on immediate hypersentivity reactions mediated by, 83 (Abst.)
and immunologic deficiency diseases; relation of IgE and IgA to respiratory tract disease in isolated IgE deficiency, IgA deficiency, and ataxia telangiectasia, *37* (Abst.)
serum IgE concentration of patients with acquired hypogammaglobulinemia, thymoma and hypogammaglobulinemia, myotonic dystrophy, intestinal lymphangiectasia and Wiskott-Aldrich syndrome, *31* (Abst.)
levels, serum, of selected recipients on apparent P-K titer of reaginic serum, influence of, 108 (Abst.)
-mediated histamine release, evidence against requirement of C3 for; role of complement in human immediate hypersensitivity, 110 (Abst.)
from human leukocytes, heavy water enhances: evidence for microtubule involvement, *39* (Abst.)
molecules, binding of, on human basophils, 79 (Abst.)
myeloma protein and anti-IgE, failure to obtain histamine release from rat mast cells exposed to human allergic serum and specific antigen or, 82 (Abst.)
rat, synthesis of, by aerosol immunization, *6* (Abst.)
in sera that contain precipitins to Aspergillus, 111 (Abst.)
serum, comparison of three methods for measurement of, 110 (Abst.)
in serum, nasal fluid and sputum, correlation of skin, nasal and inhalation tests with, *47* (Abst.)
synthesis of, by human fetus, 78 (Abst.)
formation, in vitro, by peripheral lymphocytes of normal donors and nonsteroid and steroid treated asthmatic patients, 90 (Abst.)
G, IgE and, antibody responses during immunotherapy, 79 (Abst.)
Ga, IgE and, rat, antibodies in vitro and in vivo, effect of phosphatidylserine on immediate hypersensitivity reactions mediated by, 83 (Abst.)
M: fixation of human complement by Fc fragment, *22* (Abst.)
specific, in hydatid disease, *16* (Abst.)
on surface of neoplastic lymphocytes, *32* (Abst.)
synthesis, effect of hydrocortisone and isoproterenol on (Smith, R. S., et al.), 328
Immunologic(al) aspects of hypersensitive lung disease from exposure to avian antigens, 104 (Abst.)

Immunologic(al)—Cont'd
relationship of ragweed pollen antigens E and Ra.3, studies on (Lichtenstein et al.), 285
release of chemical mediators from human nasal polyps, 105 (Abst.)
of histamine from human lung tissue, effect of prostaglandins on, 106 (Abst.)
research and diagnosis, third summer school in methods of, 190 (Announcement)
response of offspring, mumps-virus infection in pregnant women and, *23* (Abst.)
survey of house dust for mite antigens, 118 (Abst.)
Immunology, *5*, *12*, *21*, *28*, *35*, *47* (Abst.)
clinical: (2) skin, nasal and bronchial tests; allergic broncho-pulmonary aspergillosis, *5* (Abst.)
Immunosorbent assay, enzyme-linked (ELISA), estimation of serum IgE by (Hoffman), 303
elution of reagins from, with allergens, demonstration of reagin-allergen complexes formed on, *14* (Abst.)
Immunotherapy, adverse reactions to, with Alternaria, 84 (Abst.)
effect of, on appearance of antibodies to ragweed in external secretions (Tse, K. S., et al.), 208
in chronic asthmatic children (Tuchinda and Chai), 131
IgE and IgG antibody responses during, 79 (Abst.)
and pollen exposure, effect of, on total IgE and IgE antibodies in serum, 109 (Abst.)
Inbred strains of rats, reagin synthesis in, 107 (Abst.)
Infants fed breast, soy, or cow milk, development of childhood allergy in (Halpern, S. R., et al.), 139
Infection(s), mumps-virus, in pregnant women and immunologic response of their offspring, *23* (Abst.)
nematode, effect of various adjuvant regimens and, on reaginic antibody response to egg albumin in rat, *15* (Abst.)
recurrent, uses and abuses of plasma therapy in patient with (Miller), 45
respiratory, of mice, effect of allergenic extracts of house dust and bacterial vaccine on (Hardegree et al.), 1
upper respiratory, similar incidence of, in asthmatics and normal siblings, 122 (Abst.)
"Infectious" asthma, transcricothyroid cultures in, 122 (Abst.)
Infusion therapy, normal granulocyte, for aspergillosis in chronic granulomatous disease, *45* (Abst.)
Inhalation challenge(s), allergen, in asthmatic patients, duration and specificity of sodium cromolyn on, 87 (Abst.)
in asthmatics, 87 (Abst.)
experimental, of house dust extract, late bronchial obstructive reaction to, *26* (Abst.)
Interferon induction, lack of, in man by hyposensitization injections, 91 (Abst.)
Intestinal microflora of immunoglobulin-deficient and normal human subjects, *39* (Abst.)
Iron, allergic contact sensitization to (Baer), 35
Isoniazid, aminosalicylic acid and streptomycin, experience with lymphocyte transformation tests in evaluating allergy to, *12* (Abst.)
Isoproterenol, hydrocortisone and, effect of, on immunoglobulin synthesis (Smith, R. S., et al.), 328

J

Jejunoileitis, nongranulomatous ulcerative, with hypogammaglobulinemia; clinical remission after treatment with gamma globulin, *40* (Abst.)

L

Leukocyte(s) in asthma, abnormal degradation of macroaggregated albumin by; transferable defect, 89 (Abst.)
of asthmatic children, stimulation of adenylate cyclase by phentolamine in, 106 (Abst.)
basophilic, in allergic contact dermatitis, 127 (Abst.)
histamine release, correlation of severity of reaction, skin sensitivity and, in Hymenoptera allergy, 98 (Abst.)
human, effect of hydrocortisone on antigenic histamine release in, 84 (Abst.)
heavy water enhances IgE-mediated histamine release from: evidence for microtubule involvement, *39* (Abst.)
peripheral, mechanism of non-specific desensitization of, during intravenous infusion of allergen, 80 (Abst.)
of ragweed-sensitive individuals, decreased antigen uptake by; studies with ^{14}C-labeled ragweed antigens, 115 (Abst.)
sensitivity with IgE antibody, exponential relationship of, 108 (Abst.)
sensitized human, stimulation of histamine-forming capacity by antigen in, *28* (Abst.)
Localization of hapten in guinea pigs fed picryl chloride, studies on, 7 (Abst.)

Localized heat and cold urticaria (Tennenbaum and Lowney), 57
Lung disease, childhood, hereditary alpha-1 antitrypsin defect in, 86 (Abst.)
chronic obstructive (COLD), selective immunoglobulin A (IgA) deficiency and, family study, 123 (Abst.)
hypersensitive, from exposure to avian antigens, immunologic aspects of, 104 (Abst.)
recurrent and chronic, of childhood, alpha-1-antitrypsin (AAT) protease inhibitor (Pi) types in, 85 (Abst.)
fragments, human, antigen-antibody mediated desensitization of, 80 (Abst.)
function, prognosis and, in children with bronchial asthma and recurrent pneumonia, *18* (Abst.)
priming phenomenon in, 95 (Abst.)
tissue, human, effect of prostaglandins on immunologic release of histamine from, 106 (Abst.)
titers, chopped, IgE antibodies, PK titers, and, concentration of, in sera from children with hypersensitivity to cod (Foucard et al.), 39
Lupus erythematosus, systemic (SLE), detection of anti-DNA antibodies in, by counterimmunoelectrophoresis (CIE), 101 (Abst.)
Lymphocyte(s), autosensitization of, against thymus reticulum cells, *22* (Abst.)
of bursa of Fabricius, production of specific antibody by, *21* (Abst.)
depression, characteristics of measles virus-induced, 126 (Abst.)
human, surface molecular components of, *31* (Abst.)
membrane receptors and in vitro responsiveness of, in immunodeficiency, 125 (Abst.)
neoplastic, immunoglobulins on surface of, *32* (Abst.)
peripheral, in vitro immunoglobulin formation by, of normal donors and nonsteroid and steroid treated asthmatic patients, 90 (Abst.)
reaction, mixed, inhibition of, with Fab fragments from antihuman ALG, *30* (Abst.)
stimulated human, inhibition by *Bordetella pertussis* extract (Bpe) of tritiated thymidine uptake (TTU) in, 92 (Abst.)
thymus-derived: humoral and cellular reactions distinguished by hydrocortisone, *13* (Abst.)
transformation tests, experience with, in evaluating allergy to aminosalicylic acid, isoniazid and streptomycin, *12* (Abst.)
Lymphocytopenia in acute renal failure, 104 (Abst.)
Lymphoid cell(s), thymic and marrow, elaboration of MIF by; cellular immunity in vitro, *11* (Abst.)
Lymphoid cell(s)—Cont'd
traffic in chicken, ontogenetic studies on, *14* (Abst.)

M

Mast cells, effect of adrenergic drugs on, 91 (Abst.)
Maturation, changes in antigen E content of short ragweed during, 115 (Abst.)
Measles, immunity to, in children vaccinated before and after 1 year of age, *34* (Abst.)
natural, and chicken pox, effect of, on methacholine and antigen bronchial sensitivity in children with chronic asthma, 94 (Abst.)
virus-induced lymphocyte depression, characteristics of, 126 (Abst.)
Melittin from honey bee venom, allergenic and biological activities of, *46* (Abst.)
Membrane receptors and in vitro responsiveness of lymphocytes in immunodeficiency, 125 (Abst.)
Metabolism, corticosteroid, in patients with bronchial asthma, adverse effects of phenobarbital on, *3* (Abst.)
Metabolite, drug, immune thrombocytopenia due to, *28* (Abst.)
Methacholine and antigen bronchial sensitivity in children with chronic asthma, effect of natural measles and chicken pox on, 94 (Abst.)
challenge and diagnosis of bronchial asthma, 94 (Abst.)
Mice, *Bordetella pertussis* vaccinated, regulation of epidermal adenyl cyclase in normal and, 93 (Abst.)
pertussis-treated, effects of nucleotides on histamine hypersensitivity of, 92 (Abst.)
respiratory infections of, effect of allergenic extracts of house dust and bacterial vaccine on (Galant et al.), 1
MIF, elaboration of, by thymic and marrow lymphoid cells; cellular immunity in vitro, *11* (Abst.)
Milk, breast, soy, or cow, infants fed, development of childhood allergy in (Halpern, S. R., et al.), 139
Mineral oil adjuvants, mechanism of action of; conditions influencing in vitro stability of water-in-oil emulsions (Steinberg and Norman), 238
Mitosis, epidermal, in vitro, failure of catecholamines to inhibit (Carr et al.), 255
Molecular components, surface, of human lymphocytes, *31* (Abst.)
Molecules, IgE, binding of, on human basophils, 79 (Abst.)
Monkey mast cells, release of histamine and slow reacting substance of anaphylaxis (SRS-A) by IgE-anti-IgE reactions on, 7 (Abst.)

Mumps-virus infection in pregnant women and immunologic response of their offspring, *23* (Abst.)
Myeloma protein, IgE, and anti-IgE, failure to obtain histamine release from rat mast cells exposed to human allergic serum and specific antigen or, 82 (Abst.)

N

Nasal challenge and in vitro tests of immediate hypersensitivity, clinical sensitivity to green algae demonstrated by (Bernstein and Safferman), 22
IgE concentrations, serum and, seasonal changes in (Yunginger and Gleich), 174
polyps, human, immunologic release of chemical mediators from, 105 (Abst.)
secretions from patients allergic to ragweed, antigen-antibody complexes in/on eosinophils in, 124 (Abst.)
skin and bronchial tests; allergic bronchopulmonary aspergillosis; clinical immunology, *5* (Abst.)
wash, salivary, and sputum IgA concentrations in atopic and nonatopic individuals (Salvaggio, J., et al.), 335
Nematode infection, effect of various adjuvant regimens and, on reaginic antibody response in egg albumin in rat, *15* (Abst.)
Neutropenia, fever, abdominal pain, and agammaglobulinemia (Buckley and Rowlands), 308 (Allergy rounds)
Newborn infant, cellular immunity in; is cellular immunity passed from mother to fetus? 104 (Abst.)
Nippostrongylus brasiliensis in rat, protective immunity to; central role of lymphocyte in worm expulsion, *38* (Abst.)
Normal and atopic subjects, effect of epinephrine on platelet aggregation in (Solinger et al.), 29
Nucleotides, effects of, on histamine hypersensitivity of pertussis-treated mice, 92 (Abst.)

O

Obituaries
Sam M. Beiser, 62
Edward A. Essex, 62
Harold E. Medivetsky, 64
Joseph W. Noah, 189
Irving William Schiller, 63
Ontogenetic studies on lymphoid cell traffic in chicken, *14* (Abst.)
Oscillation technique, forced, evaluation of total pulmonary resistance in infants and young children by, 96 (Abst.)

P

Pathology, pharmacology, physiology, and, *11*, *20*, *46* (Absts.)
Pediatrics, *4*, *10*, *19*, *27*, *34*, *44* (Absts.)
Penicillin hypersensitivity, allergic diseases, and aeroallergen hypersensitivity, prevalence of, in various populations, 100 (Abst.)
Study Group of American Academy of Allergy, Progress Report of, 119 (Abst.)
Pertussis-treated mice, effects of nucleotides on histamine hypersensitivity of, 92 (Abst.)
Pharmacologic(al) assessment of single drugs and drug combinations in exercise-induced asthma, 88 (Abst.)
studies, clinical and, of vibratory angioedema, 98 (Abst.)
Pharmacolgy, physiology, and pathology, *11*, *20*, *46* (Absts.)
Phenobarbital, adverse effects of, on corticosteroid metabolism in patients with bronchial asthma, *3* (Abst.)
Phentolamine, stimulation of adenylate cyclase by, in leukocytes of asthmatic children, 106 (Abst.)
Phosphatidylserine, effect of, on immediate hypersensitivity reactions mediated by rat IgE and IgGa antibodies in vitro and in vivo, 83 (Abst.)
Physiology, pharmacology, and pathology, *11*, *20*, *46* (Absts.)
Picryl chloride, studies on localization of hapten in guinea pigs fed, *7* (Abst.)
Piperazine dihydrochloride; asthma due to inhaled chemical agents, *43* (Abst.)
PK titer(s), IgE antibodies, and chopped lung titers, concentration of, in sera from children with hypersensitivity to cod (Foucard et al.), 39
apparent, of reaginic serum, influence of serum IgE levels of selected recipients on, 108 (Abst.)
Plasma, detection of prednisone in, by competitive protein-binding radioassay, 99 (Abst.)
human, immediate allergic reactions to, 102 (Abst.)
therapy, uses and abuses of, in patient with recurrent infections (Miller), 45
transfusions in juvenile rheumatoid arthritis, *44* (Abst.)
urinary and, cyclic AMP responses to epinephrine in asthmatic and normal subjects, 88 (Abst.)
Platelet aggregation in atopic and normal patients, 93 (Abst.), (Harwell et al.), 274
effect of epinephrine on, in normal and atopic subjects (Solinger et al.), 29
Pneumonia, recurrent, prognosis and lung function in children with bronchial asthma and, *18* (Abst.)
Pneumonitis, acute experimental hypersensitivity, in rabbits, scanning electron microscopy of, 103 (Abst.)

Pneumonitis—Cont'd
hypersensitivity, to chickens in horses, 103 (Abst.)
primate model of, 125 (Abst.)
Pollen(s), allergen derived from, small particles as source of (Lowell), 187 (Correspondence)
Ra5, ragweed: isolation, chemical properties, and genetic basis for its cutaneous activity in man, 81 (Abst.)
concentration, ragweed, variation in, to height of 108 meters (Raynor, G. S., et al.), 199
exposure, immunotherapy and, effect of, on total IgE and IgE antibodies in serum, 109 (Abst.)
extracts, grass, commercially prepared, potency and rye Group I antigen content of, 116 (Abst.)
and fungal spores, atmospheric, in Hamilton, Ontario, 1972, 124 (Abst.)
grain(s), intact ragweed, localization of ragweed antigens in, *18* (Abst.)
single, method to detect, in human bronchial tree, 113 (Abst.)
grass, effect of viability or non-viability of, on biological activity of extracts prepared from them, *27* (Abst.)
individual grass, specific sensitivity to, in some hay fever patients, *34* (Abst.)
ragweed antigens E and Ra.3, studies on immunological relationship of (Lichtenstein et al.), 285
sensitivity, ragweed, late asthmatic reactions (LAR) in, 95 (Abst.)
Polyps, human nasal, immunologic release of chemical mediators from, 105 (Abst.)
Prednisone, alternate-day, effect of, on white blood count in children with chronic asthma (Chai and Gilbert), 65
detection of, in plasma by competitive protein-binding radioassay, 99 (Abst.)
Pregnant women, mumps-virus infection in, and immunologic response of their offspring, *23* (Abst.)
President's address: allergy, allergists, and accountability (Middleton), 321
Primate model of hypersensitivity pneumonitis, 125 (Abst.)
Propranolol, histamine, acetylcholine, and, in anaphylactic hypersensitivity in guinea pigs, airway responses to (Popa, V., et al.), 344
Prostaglandins, effect of, on immunologic release of histamine from human lung tissue, 106 (Abst.)
Protease inhibitor (Pi) types, alpha-1-antitrypsin (AAT), in recurrent and chronic lung disease of childhood, 85 (Abst.)
Protein-binding radioassay, competitive, detection of prednisone in plasma by, 99 (Abst.)
Proteinosis, pulmonary alveolar, bronchopulmonary fluids in (Rupp, G. H., et al.), 227
Pulmonary alveolar proteinosis, bronchopulmonary fluids in (Rupp, G. H., et al.), 227
resistance, total, evaluation of, in infants and young children by forced oscillation technique, 96 (Abst.)

R

Rabbits, scanning electron microscopy of acute experimental hypersensitivity pneumonitis in, 103 (Abst.)
Radioassay, competitive protein-binding, detection of prednisone in plasma by, 99 (Abst.)
Radiographic contrast media, administration of, in patients with history of previous reaction, 99 (Abst.)
Ragweed allergens, short, non-pollen sources of, 114 (Abst.)
antibodies to, in external secretions, effect of immunotherapy on appearance of (Tse, K. S., et al.), 208
antigen(s)-antibody complexes in/on eosinophils in nasal secretions from patients allergic to, 124 (Abst.)
^{14}C-labeled, studies with; decreased antigen uptake by leukocytes of ragweed-sensitive individuals, 115 (Abst.)
E (Ag E), in vitro cellular responses to, 126 (Abst.)
localization of, in intact ragweed pollen grain, *18* (Abst.)
compound 48/80, and histamine, histologic studies of human skin test responses to (Atkins et al.), 263
extracts, aqueous and glycerinated short, stored at various temperatures, stability of antigen E in, 114 (Abst.)
hay fever: genetic control and linkage to HL-A haplotypes, 81 (Abst.)
is "desensitization" immunologically specific? *2* (Abst.)
specific IgE antibody measurements in diagnosis of, 112 (Abst.)
pollen allergen Ra5: isolation, chemical properties, and genetic basis for its cutaneous activity in man, 81 (Abst.)
antigens E and Ra.3, studies on immunological relationship of (Lichtenstein et al.), 285
concentration, variation in, to height of 108 meters (Raynor, G. S., et al.), 199
sensitivity, late asthmatic reactions (LAR) in, 95 (Abst.)
-sensitive individuals, decreased antigen uptake by leukocytes of; studies with ^{14}C-labeled ragweed antigens, 115 (Abst.)
short, changes in antigen E content of, during maturation, 115 (Abst.)

Rat(s) IgE and IgGa antibodies in vitro and in vivo, effect of phosphatidylserine on immediate hypersensitivity reactions mediated by, 83 (Abst.)
synthesis of, by aerosol immunization, *6* (Abst.)
inbred strains of, reagin synthesis in, 107 (Abst.)
mast cell(s) exposed to human allergic serum and specific antigen or IgE myeloma protein and anti-IgE, failure to obtain histamine release from, 82 (Abst.)
sensitized with allergic serum, serotonin and histamine release from, 82 (Abst.)
test, some comments on (Perelmutter et al.; Haddad and Korotzer), 60 (Correspondence)
Reaction(s), adverse, to immunotherapy with Alternaria, 84 (Abst.)
correlation of severity of, skin sensitivity and leukocyte histamine release in Hymenoptera allergy, 98 (Abst.)
hypersensitivity, immediate, mediated by rat IgE and IgGa antibodies in vitro and in vivo, effect of phosphatidylserine on, 83 (Abst.)
IgE-anti-IgE, on monkey mast cells, release of histamine and slow reacting substance of anaphylaxis (SRS-A) by, *7* (Abst.)
IgE-dependent, relationship between late cutaneous allergic responses and, 123 (Abst.)
previous, administration of radiographic contrast media to patients with history of, 99 (Abst.)
sensitization, in guinea pigs, effect of laundry detergent containing *Bacillus subtilis* enzyme in producing, *20* (Abst.)
Reagin-allergen complexes formed on elution of reagins from immunosorbent with allergens, demonstration of, *14* (Abst.)
synthesis in inbred strains of rats, 107 (Abst.)
Renal failure, acute, lymphocytopenia in, 104 (Abst.)
tubular function in asthmatic children on long-term disodium cromoglycate, *42* (Abst.)
Reproducibility of allergy epicutaneous test techniques (Galant and Maibach), 245
Reproduction, human, sperm antibodies as allergic problem in, 102 (Abst.)
Resistance, total pulmonary, evaluation of, in infants and young children by forced oscillation technique, 96 (Abst.)
Respiratory infections of mice, effect of allergenic extracts of house dust and bacterial vaccine on (Hardegree et al.), 1
Respiratory infections—Cont'd
upper, similar incidence of, in asthmatics and normal siblings, 122 (Abst.)
symptoms following brief exposure to cedar of Lebanon *(Cedrus libani)* dust, *48* (Abst.)
Reticulum cells, thymus, autosensitization of lymphocytes against, *22* (Abst.)
Rheumatoid arthritis, juvenile, reversal of selective IgA deficiency in child with, *44* (Abst.)
Rye Group I antigen content of commercially prepared grass pollen extracts, potency and, 116 (Abst.)

S

Salivary, nasal wash, and sputum IgA concentrations in atopic and nonatopic individuals (Salvaggio, J., et al.), 335
Seasonal changes in serum and nasal IgE concentrations (Yunginger and Gleich), 174
Seminal plasma, human, immediate allergic reactions to, 102 (Abst.)
Sensitivity, clinical, to green algae demonstrated by nasal challenge and in vitro tests of immediate hypersensitivity (Bernstein and Safferman), 22
contact, induction of cross-tolerance for, by non-immunogenic chemical; feeding dichloronitrobenzene induces tolerance to dinitrochlorobenzene, *3* (Abst.)
leukocyte, exponential relationship of, with IgE antibody, 108 (Abst.)
specific, to individual grass pollens in some hay fever patients, *34* (Abst.)
Sensitization, allergic contact, to iron (Baer), 35
reactions in guinea pigs, effect of laundry detergent containing *Bacillus subtilis* enzyme in producing, *20* (Abst.)
Serotonin and histamine release from rat mast cells sensitized with allergic serum, 82 (Abst.)
Serum(a) from children with hypersensitivity to cod, concentration of IgE antibodies, PK titers, and chopped lung titers in (Foucard et al.), 39
that contain precipitins to Aspergillus, immunoglobulin E in, 111 (Abst.)
effect of immunotherapy and pollen exposure on total IgE and IgE antibodies in, 109 (Abst.)
IgE, comparison of three methods for measurement of, 110 (Abst.)
estimation of, by enzyme-linked immunosorbent assay (ELISA) (Hoffman), 303
levels of selected recipients on apparent P-K titer of reaginic serum, influence of, 108 (Abst.)

Serum—Cont'd
and nasal IgE concentrations, seasonal changes in (Yunginger and Gleich), 174
reaginic, apparent P-K titer of, influence of serum IgE levels of selected recipients on, 108 (Abst.)
Skin, nasal and bronchial tests, allergic bronchopulmonary aspergillosis; clinical immunology, *5* (Abst.)
-reactive factor, vascular permeability induced by, interaction between "sensitized lymphocytes" and antigen in vitro, *36* (Abst.)
sensitivity and leukocyte histamine release in Hymenoptera allergy, correlation of severity of reaction, 98 (Abst.)
test correlations, bronchial challenge and, *11* (Abst.)
suppression, degree and duration of, and side effects with antihistamines (Cook et al.), 71
Sodium cromolyn, duration and specificity of, on allergen inhalation challenges in asthmatic patients, 87 (Abst.)
Sperm antibodies as allergic problem in human reproduction, 102 (Abst.)
Sputum, biochemical study on, in asthma and emphysema, 86 (Abst.)
IgA concentrations, salivary, nasal wash and, in atopic and nonatopic individuals (Salvaggio, J., et al.), 335
Status asthmaticus, double-blind evaluation of antibiotics in, 96 (Abst.)
Steroid(s), alternate-day, growth of asthmatic children during treatment with, 122 (Abst.)
nonsteroid and, treated asthmatic patients, in vitro immunoglobulin formation by peripheral lymphocytes of normal donors and, 90 (Abst.)
Sting deaths, Hymenoptera, studies of 400, 97 (Abst.)
Streptomycin, aminosalicylic acid, isoniazid and, experience with lymphocyte transformation tests in evaluating allergy to, *12* (Abst.)
Synthesis of rat IgE by aerosol immunization, *6* (Abst.)

T

Test(s), rat mast cell, some comments on (Perelmutter et al.; Haddad and Korotzer), 60 (Correspondence)
skin, nasal and bronchial; allergic bronchopulmonary aspergillosis; clinical immunology: (2), *5* (Abst.)
and inhalation, correlation of, with IgE in serum, nasal fluid and sputum, *47* (Abst.)
suppression, skin, degree and duration of, and side effects with antihistamines (Cook et al.), 71
techniques, allergy epicutaneous, reproducibility of, 113 (Abst.), 245 (Galant and Maibach)
Test(s)—Cont'd
in vitro, of immediate hypersensitivity, clinical sensitivity to green algae demonstrated by nasal challenge and (Bernstein and Safferman), 22
Therapy, plasma, uses and abuses of, in patient with recurrent infections (Miller), 45
Thermophilic actinomycetes isolated from residential heating and humidification systems, characterization of (Seabury, J., et al.), 161
Thrombocytopenia, immune, due to drug metabolite, *28* (Abst.)
Thymidine uptake, tritiated (TTU), inhibition of, by *Bordetella pertussis* extract (Bpe) in stimulated human lymphocytes, 92 (Abst.)
Thymocytes, response of, to Concanavalin A (Con A), effect of antiserum to thymus ribosomal fraction (ATRS) on, 105 (Abst.)
Thymus-derived lymphocytes: humoral and cellular reactions distinguished by hydrocortisone, *13* (Abst.)
reticulum cells, autosensitization of lymphocytes against, *22* (Abst.)
ribosomal fraction (ATRS), effect of antiserum to, on response of thymocytes to Concanavalin A (Con A), 105 (Abst.)
Thyrotropin, commercial bovine, mechanism of allergy to components of (Kirkpatrick et al.), 296
Tolylene di-isocyanate; asthma due to inhaled chemical agent, *42* (Abst.)
Tracheas, electrically stimulated human and guinea pig isolated, effect of adrenergic drugs and atropine on, 90 (Abst.)
Tuberculin, investigation of responsiveness of BCG-vaccinated children with whooping cough to, *10* (Abst.)
Tuberculosis, generalized BCG, with fatal course in two sisters, *4* (Abst.)

U

Ulcerative jejunoileitis, nongranulomatous, with hypogammaglobulinemia; clinical remission after treatment with gamma globulin, *40* (Abst.)
Urinary cyclic adenosine monophosphate (AMP), effect of ephedrine sulfate on, in normals, 89 (Abst.)
and plasma cyclic AMP responses to epinephrine in asthmatic and normal subjects, 88 (Abst.)
Urticaria, localized heat and cold (Tennenbaum and Lowney), 57 (Brief communication)

V

Varicella, prevention of, in high risk children; collaborative study, *27* (Abst.)

Vascular permeability induced by skin-reactive factor; interaction between "sensitized lymphocytes" and antigen in vitro, *36* (Abst.)
Venoms, pure, Hymenoptera anaphylaxis; diagnostic use of, 97 (Abst.)
Virus-induced lymphocyte depression, measles, characteristics of, 126 (Abst.)
Vitallium plate, allergic reaction after internal fixation of fracture using (Symeonides, P. P., et al.), 251 (Brief communication)

W

Water-in-oil emulsions, conditions influencing in vitro stability of; mechanism of action of mineral oil adjuvants (Steinberg and Norman), 238
Wheal and flare response, allergen and histamine induced, inhibitory effect of antiallergy drugs on (Galant et al.), 11
White blood count, effect of alternate-day prednisone on, in children with chronic asthma (Chai and Gilbert), 65
Whooping cough, BCG-vaccinated children with, investigation of responsiveness of, to tuberculin, *10* (Abst.)

X

X-ray changes in acute asthma: study of 515 admissions, 120 (Abst.)

Subject index*

A

Acid therapy, tranexamic, in hereditary angioneurotic edema, *18* (Abst.)

Adenylate cyclase, effect of phentolamine on, in leukocytes from asthmatic and nonasthmatic subjects (Logsdon et al.), 148

Adrenergic, beta, stimulation and blockade, effect of, on immediate hypersensitivity skin test reactions (Shereff et al.), 328

compounds, effect of, on in vitro immunoglobulin synthesis by normal human peripheral lymphocytes (Sherman et al.), 13

Albumin, bovine serum, induced homocytotropic antibody to, in nonatopic dogs (McConnell et al.), 47

egg, increased sensitivity to, in rats fed pristane (Albro et al.), 85

Allergen(s), common, clinical significance of total IgE and of specific IgE to, *7* (Abst.)

important, in dog epithelia extracts, *38* (Abst.)

of mammalian origin (Ohman et al.), 229

most common contact, *18* (Abst.)

Allergenic components, separation and characterization of birch pollen antigens with special reference to, *3* (Abst.)

Allergic histamine release, in vitro and in vivo, relationship of, *11* (Abst.)

patients, rat mast cell degranulation and routine skin tests in, *45* (Abst.)

reaction to Vitallium (Fisher), 363 (Correspondence)

responses, late cutaneous, in isolated IgE-dependent reactions (Dolovich et al.), 38

Allergy(ies), house dust, mites and, *10* (Abst.)

miscellaneous, *4*, *10*, *24*, *28*, *36*, *44* (Absts.)

Alternaria, hypersensitivity pneumonitis caused by, *36* (Abst.)

American Academy of Allergy: historian's report, 251

Aminophylline and hydrocortisone, effect of, on in vitro immunoglobulin synthesis by normal human peripheral lymphocytes (Sherman et al.), 13

Anaphylactic reaction to chamomile tea (Benner and Lee), 307 (Brief communication)

Anaphylactic reaction—Cont'd

to parathyroid hormone (O'Rourke et al.), 55

Anaphylaxis, *23*, *32* (Absts.)

Anesthesia, general, extreme epinephrine sensitivity with, *24* (Abst.)

Angioneurotic edema, hereditary, tranexamic acid therapy in, *18* (Abst.)

Announcements, 62, 191, 256, 320, 364

Antibody(ies), antigen-specific reaginic, in vitro, using human skin, detection of, *38* (Abst.)

antiragweed and antihorseradish peroxidase homocytotropic, properties of (Spitzer et al.), 63

homocytotropic (IgE), histamine release from rat mast cells passively sensitized with, *6* (Abst.)

two classes of, in rhesus monkey, *40* (Abst.)

IgE, effect of corticosteroids on seasonal increases in (Henderson et al.), 352

induced homocytotropic, to bovine serum albumin in nonatopic dogs (McConnell et al.), 47

influence of, on induction and elicitation of allergic contact dermatitis, *29* (Abst.)

natural human, to "hidden" membrane components, *46* (Abst.)

response in allergic man, specific reaginic, association of HL-A7 cross reacting group with, *2* (Abst.)

type specific fluorescent, correlation of, to ragweed with symptomatology, *26* (Abst.)

Antigen(s), anaphylatoxin, and compound 48/80, cross-desensitization between, *23* (Abst.)

antibody mediated desensitization of human lung fragments in vitro (Drazen et al.), 158

aselective; immunochemical study of pigeon breeder's disease, *21* (Abst.)

birch pollen, separation and characterization of, with special reference to allergenic components, *3* (Abst.)

HL-A7 cross reacting group, association of, with specific reaginic antibody response in allergic man, *2* (Abst.)

localization of, in experimental bronchoconstriction in guinea pigs (Richardson et al.), 172

*July, pp. 1-62; August, pp. 63-130; September, pp. 131-192; October, pp. 193-256; November, pp. 257-320; December, pp. 321-378.

Abstracts: July, pp. *1-8*; August, pp. *9-16*; September, pp. *17-24*; October, pp. *25-32*; November, pp. *33-40*; December, pp. *41-48*.

Antigen(s)—Cont'd
purified, and whole pollen extracts, capacity of, to release histamine from leukocytes of hay fever patients (Norman and Lichtenstein), 94
recognition and immune response, *6* (Abst.)
specific reaginic antibody in vitro using human skin, detection of, *38* (Abst.)
Antigenic site, hidden, localized to constant region of light chains of immunoglobulins, *15* (Abst.)
Aplasia, familial thymic, *46* (Abst.)
Arthus, immediate, and delayed-type skin reactions in rhesus monkeys infected with *Schistosoma mansoni* or mycobacteria (Maddison et al.), 131
Aspermatogenesis; exploration as model for auto-allergic diseases, *13* (Abst.)
induction of, by passive transfer of immune sera or cells, *12* (Abst.)
Aspirin and subtypes of asthma (Falliers), 141
Asthma, acute, subjective symptoms of, within heterogeneous sample of asthmatics (Kinsman et al.), 284
aspirin and subtypes of (Falliers), 141
and Brisbane climate, *44* (Abst.)
bronchial, basophils in, with reference to reagin-type allergy, *26* (Abst.)
exercise induced, *10* (Abst.)
problems of interpreting (Godfrey et al.), 199
extrinsic and intrinsic, cromolyn in (Blumenthal et al.), 105
and hay fever, *2*, *10*, *26*, *34*, *42* (Absts.)
patients, chronic, changes in corticosteroid usage by, during cromoglycate treatment (Toogood et al.), 334
spontaneous canine, effect of prednisone on (Arkins and Hogan), 278
Asthmatic children, minimal digital clubbing in, *43* (Abst.)
and nonasthmatic subjects, effect of phentolamine on adenylate cyclase and on isoproterenol stimulation in leukocytes from (Logsdon et al.), 148
patients, platelet aggregation in (Solinger et al.), 318 (Correspondence)
Atopic diseases, serum IgD concentrations in children with (Brasher et al.), 167

B

Bacillus subtilis, enzymes of, in factory workers and consumers, clinical and immunological responses to, *36* (Abst.)
Basophils in bronchial asthma with reference to reagin-type allergy, *26* (Abst.)
Beta adrenergic stimulation and blockade, effect of, on immediate hypersensitivity skin test reactions (Shereff et al.), 328
Biosynthesis, prostaglandin, by skin, effect of non-steroid anti-inflammatory drugs on, *19* (Abst.)
Breath-by-breath assessment of response to bronchodilator (Sobol), 358
Brisbane climate, asthma and, *44* (Abst.)
Bronchial asthma, basophils in, with reference to reagin-type allergy, *26* (Abst.)
Bronchoconstriction, in guinea pigs, experimental, localization of antigen in (Richardson et al.), 172
Bronchodilator, breath-by-breath assessment of (Sobol), 358

C

Cancer, effects of surgery on lymphocyte transformation in patients with, *22* (Abst.)
Canine asthma, spontaneous, effect of prednisone on (Arkins and Hogan), 278
Cat pelts, characterization of allergen extracted from (Ohman et al.), 229
Cell-mediated immunity and complement fixation in pigeon breeders' disease (Caldwell et al.), 225
Cellular immunodeficiency, PHA skin test in diagnosis of (Lawlor et al.), 31
Chamomile tea, anaphylactic reaction to (Benner and Lee), 307 (Brief communication)
Children allergic to foods, in vivo stimulation of peripheral lymphocytes to proliferation after oral challenge of, *21* (Abst.)
with atopic diseases, serum IgD concentrations in (Brasher et al.), 167
Chloride, phenylglycine acid, hypersensitivity to (Kammermeyer and Mathews), 73
Choroid plexus, host immunoglobulin G and complement deposits in, during spontaneous immune complex disease, *31* (Abst.)
Clinical immunology, 60 (Correspondence)
emerging concept of, 129 (Correspondence)
Clubbing, minimal digital, in asthmatic children, *43* (Abst.)
Conceptus, human, synthesis of IgE by (Miller et al.), 182
Contact allergens, most common, *18* (Abst.)
Correspondence, 60, 129
Corticosteroid(s), effect of, on seasonal increases in IgE antibody (Henderson et al.), 352
usage, changes in, during cromoglycate treatment (Toogood et al.), 334
Cromoglycate treatment, changes in corticosteroid usage by chronic asthma patients during (Toogood et al.), 334
Cromolyn in extrinsic and intrinsic asthma (Blumenthal et al.), 105
Cross-reactivity of airborne molds and dermatophytic fungi (Jones et al.), 346
Cutaneous allergic responses, late, in isolated IgE-dependent reactions (Dolovich et al.), 38

D

Dermatitis, allergic contact, influence of antibody on induction and elicitation of, *29* (Abst.)

Dermatology, *18* (Absts.)

Dermatophagoides pteronyssinus, hyposensitization with, in house dust allergy, *42* (Abst.)

spp., grass pollen and other common allergens, clinical significance of total IgE and of specific IgE to, *7* (Abst.)

Dermatophytic fungi, cross-reactivity of airborne molds and (Jones et al.), 346

Desensitization, antigen-antibody mediated, of human lung fragments in vitro (Drazen et al.), 158

insect, treatment failure (Torsney), 303 (Brief communication)

Digitoxin-induced thrombocytopenia, *4* (Abst.)

Diseases, atopic, serum IgD concentrations in children with (Brasher et al.), 167

nonmalignant, approach to use of immunosuppressive drugs in (Steinberg), 242

Disodium cromoglycate, inhibition of immediate hypersensitivity reactions by, *43* (Abst.)

response to, in skin-test positive and skin-test negative subjects; exercise induced asthma, *10* (Abst.)

topical, clinical trial of, in vernal keratoconjunctivitis, *16* (Abst.)

Dog(s) epithelia extracts, important allergen in, *38* (Abst.)

nonatopic, induced homocytotropic antibody to bovine serum albumin in (McConnell et al.), 47

Drugs, immunosuppressive, in nonmalignant diseases, approach to use of (Steinberg), 242

non-steroid anti-inflammatory, effect of, on prostaglandin biosynthesis by skin, *19* (Abst.)

E

Edema, hereditary angioneurotic, tranexamic acid therapy in, *18* (Abst.)

Egg albumin, increased sensitivity to, in rats fed pristane (Albro et al.), 85

Emotional factors in asthma, and response to treatment (Kinsman et al.), 284

Environment, natural, study of population of house dust mite in, *45* (Abst.)

Enzyme(s) of *Bacillus subtilis* in factory workers and consumers, clinical and immunological responses to, *36* (Abst.)

-potentiated hyposensitization, *32* (Abst.)

release from polymorphonuclear leukocyte lysosomes, *28* (Abst.)

Eosinopenic responses, effect of beta stimulant on (Gayrard), 319 (Correspondence)

Eosinophilosis, pulmonary (tropical eosinophilia), immunoglobulins in, *30* (Abst.)

Epinephrine sensitivity, extreme, with general anesthesia, *24* (Abst.)

Exercise-induced asthma, problems of interpreting (Godfrey et al.), 199

F

Farmer's lung disease, serum immunoglobulin levels in (Roberts et al.), 297

Foods, children allergic to, in vivo stimulation of peripheral lymphocytes to proliferation after oral challenge of, *21* (Abst.)

Fungi, dermatophytic, cross-reactivity of airborne molds and (Jones et al.), 346

G

Graves' disease, immunoglobulins (E, M, G) and complement in connective tissues of thyroid in, *15* (Abst.)

Guinea pig(s), localization of antigen in experimental bronchoconstriction in (Richardson et al.), 172

papillary muscle, cross-desensitization between antigen, anaphylatoxin, and compound 48/80 in, *23* (Abst.)

H

Haplotypes, HL-A, genetic control and linkage of ragweed hay fever to, *2* (Abst.)

Hashimoto thyroiditis, lymphocyte-dependent antibody-mediated cytotoxicity in, *47* (Abst.)

Hay fever, asthma and, *2*, *26*, *42* (Absts.)

patients, capacity of purified antigens and whole pollen extracts to release histamine from (Norman and Lichtenstein), 94

ragweed, diagnostic tests in (Norman et al.), 210

genetic control and linkage to HL-A haplotypes, *2* (Abst.)

Heart anaphylaxis, studies on, *23* (Abst.)

Helminthiasis, influence of serum IgE levels of patients with, on apparent P-K titre of reaginic serum, *22* (Abst.)

Hereditary angioneurotic edema, tranexamic acid therapy in, *18* (Abst.)

Histamine, antigenic release of, from leukocytes, effect of injections of allergen extracts on, *8* (Abst.)

capacity of purified antigens and whole pollen extracts to release, from leukocytes of hay fever patients (Norman and Lichtenstein), 94

release, leukocyte, in Hymenoptera-allergic patients (Yocum et al.), 265

from rat mast cells passively sensitized with homocytotropic (IgE) antibody, *6* (Abst.)

in vitro and in vivo allergic, relationship of, *11* (Abst.)

Hormone, parathyroid, anaphylactic reaction to (O'Rourke et al.), 55
House dust allergy, hyposensitization with *Dermatophagoides pteronyssinus* in, *42* (Abst.)
mites and, *10* (Abst.)
mite, study of population of, in its natural environment, *45* (Abst.)
Human conceptus, synthesis of IgE by (Miller et al.), 182
lung fragments, antigen-antibody mediated desensitization of (Drazen et al.), 158
Hydrocortisone, aminophylline and, effect of, on in vitro immunoglobulin synthesis by normal human peripheral lymphocytes (Sherman et al.), 13
effect of, on immunoglobulin synthesis and secretion by human peripheral lymphocytes in vitro, *12* (Abst.)
Hymenoptera-allergic patients, leukocyte histamine release in (Yocum et al), 265
Hymenoptera sting deaths in United States, studies of 400 (Barnard), 259
Hypersensitivity, manifestations of, determinant-dependent induction and contribution to, *40* (Abst.)
to phenylglycine acid chloride (Kammermeyer and Mathews), 73
pneumonitis (Fink), 309 (Allergy rounds)
immunologic mechanisms in (Caldwell et al.), 225
skin test reactions, immediate, effect of beta adrenergic stimulation and blockade on (Shereff et al.), 328
to tetanus toxoid (Facktor et al.), 1
Hyposensitization, enzyme-potentiated, *32* (Abst.)
with mite extract, changes in challenge tests following, *34* (Abst.)

I

Immune adherence by alternate complement pathway, *30* (Abst.)
deficiency diseases, primary, of infancy and childhood, *Pneumocystis carinii* pneumonia and, *3* (Abst.)
response, antigen recognition and, *6* (Abst.)
sera or cells, induction of aspermatogenesis by passive transfer of, *12* (Abst.)
Immunity, cell-mediated, and complement fixation in pigeon breeders' disease (Caldwell et al.), 225
Immunochemical study of pigeon breeder's disease, *21* (Abst.)
Immunodeficiency, cellular, PHA skin test in diagnosis of (Lawlor et al.), 31
disorders, various, presence of T-lymphocytes in normal humans and in humans with, *14* (Abst.)
Immunoglobulin(s) D concentrations, serum, in children with atopic diseases (Brasher et al.), 167
distribution of, in palatine and pharyngeal tonsils, *20* (Abst.)
Immunoglobulin(s)—Cont'd
E antibody, effect of corticosteroids on seasonal increases in (Henderson et al.), 352
-dependent reactions, isolated, late cutaneous allergic responses in (Dolovich et al.), 38
identification of human reagins isolated with immunosorbent as (Kisil et al.), 23
levels in external secretions, *39* (Abst.)
serum, of selected recipients, influence of, on apparent P-K titre of reaginic serum, *22* (Abst.)
M, G, and complement in connective tissues of thyroid in Graves' disease, *15* (Abst.)
specific, clinical significance of total IgE and, to *Dermatophagoides spp.*, grass pollen and other common allergens, *7* (Abst.)
synthesis of, by human conceptus (Miller et al.), 182
G, host, and complement deposits in choroid plexus during spontaneous immune complex disease, *31* (Abst.)
hidden antigenic site, localized to constant region of light chains of, *15* (Abst.)
levels, serum, in farmer's lung disease (Roberts et al.), 297
M, persistent increased, in treated narcotic addiction (Cushman), 122
in pulmonary eosinophilosis (tropical eosinophilia), *30* (Abst.)
synthesis and secretion by human peripheral lymphocytes in vitro, effect of hydrocortisone on, *12* (Abst.)
Immunologic(al) alterations in patients with treated Whipple's disease, *5* (Abst.)
mechanisms in hypersensitivity pneumonitis (Caldwell et al.), 225
reactivity, alteration of, in chickens by in ovo administration of antisera against central lymphoid tissue, *14* (Abst.)
Immunology, *5, 12, 20, 29, 38, 46* (Absts.)
clinical, 60 (Correspondence)
emerging concept of, 129 (Correspondence)
Immunosuppressive drugs in nonmalignant diseases, approach to use of (Steinberg), 242
Immunotherapy with aqueous and alum precipitated ragweed fraction A, *34* (Abst.)
Insect allergy, stinging—treatment failures (Reisman), 257 (Editorial)
desensitization, treatment failure (Torsney), 303 (Brief communication)
Isoproterenol Mistometer, effects of (Sherbell and Lyons, 321
stimulation in leukocytes from asthmatic and nonasthmatic subjects, effect of phentolamine on (Logsdon et al.), 148

K

Kerato-conjunctivitis, vernal, clinical trial of topical disodium cromoglycate in, *16* (Abst.)

L

Leukocyte(s) from asthmatic and nonasthmatic subjects, effect of phentolamine on adenylate cyclase and on isoproterenol stimulation in (Logsdon et al.), 148
effect of injections of allergen extracts on antigenic release of histamine from, *8* (Abst.)
of hay fever patients, capacity of purified antigens and whole pollen extracts to release histamine from (Norman and Lichtenstein), 94
histamine release in Hymenoptera-allergic patients (Yocum et al.), 265
Lung disease, farmer's, serum immunoglobulin levels in (Roberts et al.), 297
fragments, human, antigen-antibody mediated desensitization of (Drazen et al.), 158
Lymphocyte-dependent antibody-mediated cytotoxicity in Hashimoto thyroiditis, *47* (Abst.)
Lymphocyte(s), human peripheral, in vitro, effect of hydrocortisone on immunoglobulin synthesis and secretion by, *12* (Abst.)
normal human peripheral, effect of adrenergic compounds on in vitro immunoglobulin synthesis by (Sherman et al.), 13
peripheral, in vivo stimulation of, to proliferation after oral challenge of children allergic to foods, *21* (Abst.)
sensitivity to skeletal muscle in patients with polymyositis and other disorders (Esiri et al.), *31* (Abst.)
transformation in patients with cancer, effects of surgery on, *22* (Abst.)
Lymphoid tissue(s), central, alteration of immunological reactivity in chickens by in ovo administration of antisera against, *14* (Abst.)
thymus and other, effects of measles on, *19* (Abst.)
Lymphotoxin, human, for tumor and normal human tissue cells in vitro, cytotoxicity of, *48* (Abst.)
in vitro effect of, on microorganisms, *35* (Abst.)
Lysosomes, polymorphonuclear leukocyte, enzyme release from, *28* (Abst.)

M

Macaca mulatta, delayed hypersensitivity to *Schistosoma mansoni* and tuberculin in, *5* (Abst.)
Mammalian origin, allergens of (Ohman et al.), 229
Measles, effects of, on thymus and other lymphoid tissues, *19* (Abst.)
Microorganisms, in vitro effect of human lymphotoxin on, *35* (Abst.)
Mistometer, isoproterenol, effects of (Sherbell and Lyons), 321
Mite(s) extract, hyposensitization with, changes in challenge tests following, *34* (Abst.)
and house dust allergy, *10* (Abst.)
Molds, airborne, and dermatophytic fungi, cross-reactivity of (Jones et al.), 346

N

Narcotic addiction, treated, persistent increased immunoglobuin M in (Cushman), 122
Nasal patency, assessing degree of, by measuring peak expiratory flow rate through nose (Taylor et al.), 193
Nucleotides, cyclic, regulation of enzyme release from polymorphonuclear leukocyte lysosomes by autonomic drugs and, *28* (Abst.)

Obituaries
Samuel M. Feinberg, 254
Jacques Leger, 190
William Messer, 130
Benjamin Nozik, 189
George A. Peck, 255
Francis Minot Rackemann, 189
Charles G. Speicher, 130
Harold C. Wagner, 189
Edwin R. Webber, 255
Ophthalmology and otolaryngology, *16* (Absts.)

P

Palatine and pharyngeal tonsils, distribution of immunoglobulins in, *20* (Abst.)
Parathyroid hormone, anaphylactic reaction to (O'Rourke et al.), 55
Pathology, pharmacology, and physiology, *11*, *18*, *27*, *35*, *43* (Absts.)
Peak expiratory flow rate through nose, assessing degree of nasal patency by measuring (Taylor et al.), 193
Pediatrics, *3*, *43* (Absts.)
Penicillin reactions among patients in venereal disease clinics, *23* (Abst.)
Peroxidase homocytotropic antibodies, rabbit antiragweed and antihorseradish, properties of (Spitzer et al.), 63
Pharmacology, physiology, and pathology, *11*, *18*, *27*, *35* *43* (Absts.)
Pharyngeal tonsils, palatine and, distribution of immunoglobulins in, *20* (Abst.)
Phentolamine, effect of, on adenylate cyclase and on isoproterenol stimulation in leukocytes from asthmatic and nonasthmatic subjects (Logsdon et al.), 148
Phenylglycine acid chloride, hypersensitivity to (Kammermeyer and Mathews), 73
Phosphate, polyphloretin, blockage by, of prostaglandin E_1-induced human cutaneous reaction, *27* (Abst.)

Physiology, pharmacology, and pathology, *11, 18, 27, 35, 43* (Absts.)
Phytohemagglutinin (PHA) skin test in diagnosis of cellular immunodeficiency (Lawlor et al.), 31
Pigeon breeders' disease, cell-mediated immunity and complement fixation in (Caldwell et al.), 225
immunochemical study of, *21* (Abst.)
P-K titre, apparent, of reaginic serum, influence of serum IgE levels of selected recipients on, *22* (Abst.)
Pneumocystis carinii pneumonia and primary immune deficiency diseases of infancy and childhood, *3* (Abst.)
Pneumonitis, hypersensitivity, 309 (Fink) (Allergy rounds)
caused by Alternaria, *36* (Abst.)
immunologic mechanisms in (Caldwell et al.), 225
Pollen extracts, whole, capacity of purified antigens and, to release histamine from leukocytes of hay fever patients (Norman and Lichtenstein), 94
and pollen extract, technique for intense radiolabelling of, with ^{99m}Tc (Van Houten et al.), 115
Polymyositis and other disorders, lymphocyte sensitivity to skeletal muscle in patients with, *31* (Abst.)
Polyphloretin phosphate, blockage by, of prostaglandin E_1-induced human cutaneous reaction, *27* (Abst.)
Prednisone, effect of, on spontaneous canine asthma (Arkins and Hogan), 278
Pristane, rats fed, increased sensitivity to egg albumin in (Albro et al.), 85
Prostaglandin biosynthesis by skin, effect of non-steroid anti-inflammatory drugs on, *19* (Abst.)
E_1-induced human cutaneous reaction, blockage of, by polyphloretin phosphate, *27* (Abst.)
Pulmonary eosinophilosis (tropical eosinophilia), immunoglobulins in, *30* (Abst.)

R

Rabbit antiragweed and antihorseradish peroxidase homocytotropic antibodies, properties of (Spitzer et al.), 63
Radiolabelling, intense, of pollen and pollen extract with ^{99m}Tc, technique for (Van Houten et al.), 115
Ragweed, correlation of type specific fluorescent antibodies to, with symptomatology, *26* (Abst.)
fraction A, aqueous and alum precipitated, immunotherapy with, *34* (Abst.)
hay fever, diagnostic tests in (Norman et al.), 210
genetic control and linkage to HL-A haplotypes, *2* (Abst.)
Rat(s) fed pristane, increased sensitivity to egg albumin in (Albro et al.), 85
Rat(s)—Cont'd
mast cell(s) degranulation and routine skin tests in allergic patients, *45* (Abst.)
passively sensitized with homocytotropic (IgE) antibody, histamine release from, *6* (Abst.)
Reaction(s) anaphylactic, to chamomile tea (Benner and Lee), 307 (Brief communication)
immediate hypersensitivity, inhibition of, by disodium cromoglycate, *43* (Abst.)
skin test, effect of beta adrenergic stimulation and blockade on (Shereff et al.), 328
prostaglandin E_1-induced human cutaneous, blockage by polyphloretin phosphate of, *27* (Abst.)
skin, immediate, Arthus, and delayed-type in rhesus monkeys (Maddison et al.), 131
Reagin(s), human, isolated with immunosorbent as IgE, identification of (Kisil et al.), 23
-type allergy, basophils in bronchial asthma with reference to, *26* (Abst.)
Rhesus monkey(s), immediate, Arthus, and delayed-type skin reactions in (Maddison et al.), 131
two classes of homocytotropic antibodies in, *40* (Abst.)

S

Schistosoma mansoni and tuberculin in *Macaca mulatta*, delayed hypersensitivity to, *5* (Abst.)
Secretions, external, IgE levels in, *39* (Abst.)
Serum(a) albumin, bovine, induced homocytotropic antibody to, in nonatopic dogs (McConnell et al.), 47
important allergen in dog epithelia extracts, *38* (Abst.)
or cells, immune, induction of aspermatogenesis by passive transfer of, *12* (Abst.)
immunoglobulin D concentrations in children with atopic diseases (Brasher et al.) 167
levels in farmer's lung disease (Roberts et al.), 297
Skeletal muscle, lymphocyte sensitivity to, in patients with polymyositis and other disorders, *31* (Abst.)
Skin reactions in rhesus monkeys, immediate, Arthus, and delayed-type (Maddison et al.), 131
test, phytohemagglutinin, in diagnosis of cellular immunodeficiency (Lawlor et al.), 31
reactions, immediate hypersensitivity, effect of beta adrenergic stimulation and blockade on (Shereff et al.), 328
Sting deaths in United States, studies of 400 (Barnard), 259
Stinging insect allergy—treatment failures (Reisman), 257 (Editorial)

Surgery, effects of, on lymphocyte transformation in patients with cancer, *22* (Abst.)
Synthesis of IgE by human conceptus (Miller et al.), 182

T

^{99m}Tc, technique for intense radiolabelling of pollen and pollen extract with (Van Houten et al.), 115
Tetanus toxoid, hypersensitivity to (Facktor et al.), 1
Thrombocytopenia, digitoxin-induced, *4* (Abst.)
Thymic aplasia, familial, *46* (Abst.)
Thymus and other lymphoid tissues, effects of measles on, *19* (Abst.)
Thyroid, connective tissues of, in Graves' disease, immunoglobulins (E, M, G) and complement in, *15* (Abst.)
Thyroiditis, Hashimoto, lymphocyte-dependent antibody-mediated cytotoxicity in, *47* (Abst.)
T-lymphocytes, human, function and distribution pattern of, *14* (Abst.)
Tonsils, palatine and pharyngeal, distribution of immunoglobulins in, *20* (Abst.)
Tranexamic acid therapy in hereditary angioneurotic edema, *18* (Abst.)
Tuberculin, *Schistosoma mansoni* and, delayed hypersensitivity to, in *Macaca mulatta*, *5* (Abst.)
Tuberculosis, influence of serum IgE levels on apparent P-K titre of reaginic serum of patients with, *22* (Abst.)
Tumor and normal human tissue cells in vitro, cytotoxicity of human lymphotoxin for, *48* (Abst.)

V

Venereal disease clinics, penicillin reactions among patients in, *28* (Abst.)
Vitallium, allergic reaction to (Fisher), 363 (Correspondence)

W

Whipple's disease, immunologic alterations in patients with, *5* (Abst.)
Wood-pulp workers' disease, *36* (Abst.)
